

# Uplighting Hire

Unlike conventional lighting, our LED mood-lights do not get hot, therefore are completely safe from prying inquisitive fingers! This elegant form of lighting will create just the right mood for weddings, parties, corporate events and presentations.

We offer a truly bespoke service that is tailor designed for your wedding reception, function or conference. We will visit your chosen venue and discuss the various options available. From full room up-lighting, to lighting up key areas to make your wedding reception or function truly unique to you.

You can choose from literally thousands of different shades of colours. You are not limited to only 1 colour. You can have 2 or more different colours, although 1 or 2 colours work best!

We will set up, wire and configure the units in the morning of your reception ensuring the maximum **“WOW FACTOR”** when you and your guests enter the venue!

Then after your reception has ended everything will be taken away, leaving your day completely hassle free.
